

Paving The Light Transmission In Communication

Vertical Cable Administrator – Series S

High termination system consists of large number of permanent equipment cables terminated at the back of the panels. Those multi-core cables need facilities to manage neatly on the system.

Patch Cords running at the front of the High termination system also need facilities to guide the route of the cable running. Otherwise massive of patch cords will be tangled.

Hakko Opto's Vertical Cable Administrator – Series S is designed to address the cable management needs for both sides of an open rack. Fiber/copper patch cords are routed through the glide cable administrator unit to perform neat and tidy cable management function.

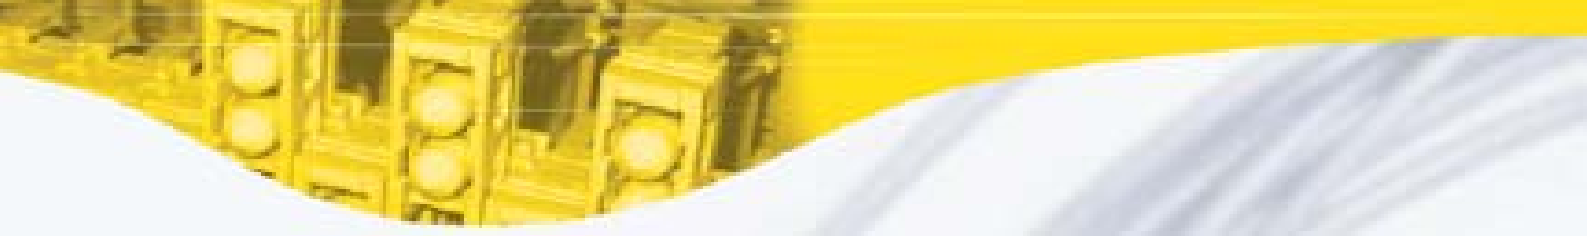

Features & Benefits

- 8", 10" and 12" width models are available
- Light weight aluminum
- Designed for quick and easy moves, adds and changes
- Cable rings for better cable management and easy access
- Cable tie facility for fixing multi-core cables at rear side.

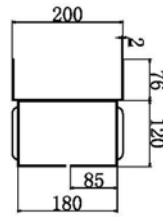

Vertical Glide Cable Administrator – Series S is a modular design and can be mounted along an open rack's left and right sides
